F. STATE FIRE MARSHAL REPORT – ROGER JOHNSON

Michael Garvey sitting in for the Marshal.

We have a partial list of bills that will impact the fire service. If you know of any bills, let us know and we will keep an eye on them.

We had a meeting organized by the Fire Chiefs last week to start a development of a memorial response team. We will be having a follow up meeting with the IVFA and all of the associations. Anyone who has an interest in this type of organization let us know. We are trying to start a state wide response team CISD.

G. HOMELAND SECURITY TRAINING DIVISION REPORT-DIRECTOR JOSEPH WAINSCOTT

We have received a couple of letters of complaint on Instructor misconduct and I have requested an investigation on these. One of these deals with Mr. Mourer again. At the last board meeting, Mr. Mourer was sanctioned and I have asked that that be put on hold, until this one is dealt with. We can then deal with them both at the same time.

Jerry Nulliner made a motion to hold the first order until further investigation could be completed on the second. Paul Covington seconded. Motion passed.

Updated tests for Instructor 1, and 2/3, will be used on Feb 1.

I want to thank all that helped. We are about a month ahead of schedule there. I have been working with Gerald George and some of his technical rescue people. We are going to be offering a number of awareness rescue classes around the state. This will be a 2 day class and cover 7 of the awareness levels. We are also looking at on line courses. We are looking 10-20 sessions around the state. They will be followed by a train-to-trainer course, involving a 3rd day. This is to help the fire instructor's around the state teach these levels.

We made a policy decision. When you receive awareness, operations and technician level, we have been mailing 3 certifications. We will no longer be doing this. You will get the higher certification. If you need the others, all you have to do is ask.

Sam is still needing help with the validation process of banks. We are looking at another situation with Driver Operator Pumper. The tests have not been validated to the new book. Keep this in mind when you are teaching this class.

I am happy to say that we are now legally ready to pass funds to district 7 for fire training. District 3 and 10 are very close.

Our division will be purchasing a number of text books to ship to the fire districts. This will be an additional resource for the instructor to use. Firefighter ½ book that was purchased also has hazmat awareness and operations, and some WMD . It is the Jones and Bartlett text. We have also purchased the IFSTA hazmat books. We are also providing copies of the Mandatory manual upon request. On the course application, indicate how many manual you need and we will ship them.

J. NEW BUSINESS

1. Rules and regulations

A task force was requested to see what the Board wants updated, mostly in the area of NFPA standards. The fiscal impact statements are the biggest challenge. We are looking at changing all of the rules; the administrative and the standards. The process takes 9 months to a year. This is something we need to start. Example: File a notice of intent in April, you are looking at an effective date of next year (2008).

2. Standard changes for 2007

Once again, we need a committee to see what standards will change and what we need to do.

3. Paul Covington submitted his resignation from the Board at this time. He is going to China for 3 years to assist in setting up a Fire Department. We wish Paul the best and thank him for his years of service and assistance to the Fire Dept. training.
